

The 5.5 Liter \$119.95

The Saratoga Jacks Thermal Cooker is an alternative, cordless method of slow cooking, and can save you up to 80% on fuel costs. It is perfect for making meals both at home and on-the-go. Made of high quality, 304 - 18/10 surgical stainless steel, the cooker is an insulated thermal unit with a lid that seals shut and a fold up/down handle for easy portability. Included are 2 inner stainless steel cooking pots, which are inserted into the cooker, of two different sizes: one 5.5L pot with a heavy duty triple layered bottom, with the addition of a smaller pot, which has a single layer bottom.

The smaller pot can be nested inside of the larger one, providing a place for an optional small side dish. Use of the smaller pot is optional. The small pot can be removed to accommodate larger quantities of food in the larger pot, which can be used separate and independent of the smaller nesting pot. Both pots can also be used on an induction stove. Feeds approx. 3-5 people

7 Liter \$139.95

The Saratoga Jacks Thermal Cooker is an alternative, cordless method of slow cooking, that saves up to 80% on fuel costs. It is perfect for making meals both at home and on-the-go. Made of high quality, 304 - 18/10 surgical stainless steel, the cooker is an insulated thermal unit with a lid that seals shut and a fold up/down handle for easy portability. Included are 2 inner stainless steel cooking pots, which are inserted into the cooker, of two different sizes: one large, 7L pot with a heavy duty triple layered bottom, with the addition of a smaller pot, which has a single layer bottom.

The smaller pot can be nested inside of the larger one, providing a place for an optional small side dish. Use of the smaller pot is optional.

The small pot can be removed to accommodate larger quantities of food in the larger pot, which can be used separate and independent of the smaller nesting pot. Both pots can also be used on an induction stove. Feeds approx. 6-11 people.

7 Liter Deluxe \$159.95

The Saratoga Jacks Thermal Cooker is an alternative, cordless method of slow cooking, that saves up to 80% on fuel costs. It is perfect for making meals both at home and on-the-go. Made of high quality, 304 - 18/10 surgical stainless steel, the cooker is an insulated thermal unit with a lid that seals shut and a fold up/down handle for easy portability. Included are 2 inner stainless steel cooking pots, which are inserted into the cooker, of two different sizes: Each pot comes with a heavy duty triple layered bottom in this Deluxe option.

The smaller pot can be nested inside of the larger one, providing a place for an optional small side dish. Use of the smaller pot is optional. The small pot can be removed to accommodate larger quantities of food in the larger pot, which can be used separate and independent of the smaller nesting pot. Both pots can also be used on an induction stove. Feeds approx. 6-11 people.
